## FIRE-WARD'S REPORT.

---

The board of fire engineers for the town of Franklin in 1876--7 submit the following report :

The Fire Department of the town of Franklin consists of eight fire engineers and 100 firemen, 50 on each engine.

The fire apparatus consists of two Hunneman hand engines with hose carriages, buckets, axes, and other fixtures usually belonging to that class of engines, all in good order, and about 1500 feet of leather hose most of which is good and in good condition. Fifty feet of ladders have been put into each of the engine houses to be used in case of fire and for no other purpose. A small rotary pump has been put in at Mr. Taylor's foundry, to be used for fire purposes, which will furnish water on any part of Main street above the Webster House, also on High street as far as the grist mill.

### RESERVOIRS.

The Reservoirs in the East Village have kept full the entire year, the supply of water being just sufficient for that purpose and to supply the new school house. The reservoir near the bridge has had, much of the time since last summer, no supply. We have been obliged to fill it from the pump recently put in at Taylor's foundry. The reservoir near the depot has not been full, the spring from which the supply was drawn having failed to furnish the amount necessary.

### FIRES AND ALARMS.

There have been but four alarms of fire during the year.

First. August 14, 1876, in building owned by P. L. Kennedy and Mrs. Wilson and occupied by P. L. Kennedy as a saloon. Loss small.

Second. Nov. 29, 1876, in same building. Cause, cinders dropping from chimney on roof. No loss.

Third. Jan. 4, 1877, in same building. Burned. Cause unknown. Loss \$3,000.

Fourth. Feb. 20, 1877. Fire in dwelling house of Walter Aiken. Burned. Cause supposed defect in fireplace. Loss, \$30,000.

Aug. 7, 1876. The dwelling house and barn of John H. Frisbee at Shaw's Corner was destroyed by fire. No alarm. Cause unknown. Loss \$900. No insurance.

Nov. 30, 1876. A small dwelling house owned by Nathl. M. Colby on the plains was burned without alarm. Cause unknown. Loss \$250.

EXPENSES.

|   | \$1425 69 |

Our last two fires have proved the insufficiency of our water supply in many portions of our villages; also how necessary it is to have some provision made and made at once to furnish water and power to force it where it may be needed. An arrangement might be made with the Paper Co. to run their steam pump in mill No. 1, and the town should furnish hose to protect all the property within 1000 feet. So supplied, water might be used from the engines in almost any place where there is danger from fire. A chemical engine would also be a valuable auxiliary to our present apparatus, their extreme lightness and general adaptation to their purpose seem to make it almost a necessity. In the first stages of fire in a building it may be put out by one of these engines before it would be possible to lay hose and get a stream of water with an ordinary engine.

Our firemen can and do with our present facilities accomplish anything in the range of possibility and the suggested improvements we think will make the impossible hard to find.

All of which is respectfully submitted.
